Technical Skills

- **Frontend:**
  React.js · Next.js · Redux · TypeScript · JavaScript (ES6+) · HTML5 · CSS3 · Tailwind CSS · Bootstrap · Responsive Design
- **Backend:**
  Node.js · Express.js · REST APIs · Microservices · Authentication · JWT · Firebase
- **Databases:**
  PostgreSQL · MongoDB · Firebase · Supabase
- **DevOps & Cloud:**
  Docker · Kubernetes · CI/CD · GitHub Actions · Vercel
- **Architecture:**
  Microservices · Event Bus · CQRS · Async Communication
- **Tools & Workflow:**
  · Git · GitHub · Postman · Chrome DevTools · Figma · Vite · Nodemon · NPM · VS Code

Certifications

- **Udemy** — The Complete Node.js Developer Course (3rd Ed.)
  Andrew Mead & Rob Percival — *Apr 2026*
- **Udemy** — Microservices with Node.js & React
  Docker · Kubernetes · Distributed Systems · SSR · Event Bus · CQRS · Testing — *2026*
- **Udemy** — Complete Full-Stack Web Dev Bootcamp
  Dr. Angela Yu — *Sep 2025*
- **Udemy** — React: The Complete Guide
  incl. Next.js & Redux — *Mar 2025*
- **FlexiSAF Edusoft** — Frontend Development — *2025*
- **Girl Code Group** — Hackathon Participation — *2024*

Profile

I am a Full-Stack Developer experienced in building modern, responsive web applications and scalable backend systems. Proficient in React, Next.js, TypeScript, Node.js, Express, and Tailwind CSS, with experience working with databases, REST APIs, authentication, and cloud platforms. I focus on building clean, reliable, and user-friendly applications while continuously improving my problem-solving and software engineering skills.

Professional Experience

Full-Stack Engineer (Contractor) — *AZM Nexus Limited, Lagos* — Jul 2026 – Aug 2026

- Developed and maintained web applications, dashboards, APIs, and internal tools using modern web technologies.
- Worked with product and design requirements to build responsive and user-friendly features.
- Used Git and followed team coding practices to write clean, maintainable code.
- Collaborated with developers, designers, and QA team members to complete tasks and deliver project features.

Frontend Developer (Intern) — *Depositoo* — Nov 2025 – Mar 2026

- Developed and shipped responsive frontend pages and UI features using React and TypeScript across active sprint cycles.
- Integrated frontend interfaces with backend APIs, handled data flow, and implemented feature updates.
- Fixed UI issues and bugs while improving the usability and stability of the application.
- Collaborated with the development team to deliver features and updates based on project requirements.

Frontend Developer (Intern) — *FlexiSAF Edusoft Limited* — May 2025 – Aug 2025

- Worked on React and Redux features through hands-on sprint tasks and responsive UI development.
- Collaborated with team members to solve development problems and implement new features.
- Participated in planning, coding, peer code reviews, and testing throughout development cycles.
- Worked with stakeholders and the development team to deliver project tasks and milestones.

Full-Stack Developer (Intern) — *Tarantulla.co* — Jan 2025 – Jun 2025

- Built a full-stack web application using React and Firebase, with real-time data and authentication.
- Developed responsive UI components for desktop and mobile.
- Deployed the application with Vercel and managed the project using Git workflows.

Frontend Developer (Freelance) — *IneTech Morocco (Remote)* — Jan 2024 – Jun 2024

- Delivered 3+ responsive client websites (HTML, CSS, JavaScript, Bootstrap)
- Translating design briefs into pixel-accurate cross-device interfaces.
- Managed Git version-control workflows, enabling clean collaboration and rollback capability across all client projects.

Projects

- **Microservices Blog Platform** — github.com/meedaah19
  - Built a 5-service blog platform using Node.js, Express, and React.
  - Implemented event-driven communication between services for handling application events.
  - Developed a CQRS-style query service to combine and serve posts and comments.
  - Containerized services with Docker and deployed them using Kubernetes.

  Node.js · Express · React · SSR · Docker · Kubernetes · Event-Driven Architecture · REST APIs

- **FinSight — Smart Expense Tracker** — github.com/meedaah19/FinSight-Frontend
  - Built a full-stack expense tracking application with React, TypeScript, Node.js, Express, and MongoDB.
  - Implemented secure JWT authentication and CRUD operations for managing income, expenses, budgets, and financial records.
  - Developed a financial insights dashboard with spending summaries, category breakdowns, and monthly and weekly trends.
  - Built REST APIs and integrated the frontend with the backend to provide real-time financial data and insights.

  React · TypeScript · Node.js · Express · MongoDB · JWT · REST APIs · Tailwind CSS

- **Agro Smart Climate** — github.com/meedaah19/agro-smart-climate
  - Built a full-stack web application using React, Node.js, Supabase, and PostgreSQL.
  - Implemented user authentication, profiles, and KYC verification to manage secure user access.
  - Integrated weather APIs to provide location-based weather information and support crop-related decisions.
  - Developed responsive dashboard features for managing user data, crops, and weather information.

  React · Node.js · Supabase · PostgreSQL · REST APIs · Authentication · Weather API · Vercel

- **Pasch Alumni Platform** — github.com/meedaah19/pasch-alumni
  - Built an alumni platform to help former students connect, share updates, and stay engaged with the community.
  - Developed responsive frontend features for alumni profiles, connections, and community interactions.
  - Integrated Firebase for authentication, database management, and real-time application data.
  - Implemented user-focused features to make it easier for alumni to discover and connect with each other.

  React · Firebase · JavaScript · Authentication · Realtime Database · Responsive Design

Education

BSc, Agriculture — *University of Ilorin, Kwara State* — Jun 2021 – 2026

- Degree completed 2026. Pursued self-directed full-stack engineering education alongside my degree.
